NOT-WITH-STAND'ING, the *participle* of WITHSTAND, with *not* prefixed, and signifying not opposing, nevertheless. It retains in all cases its participial signification. For example: "I will surely rend the kingdom from thee, and will give it to thy servant, *notwithstanding*, in thy days I will not do it, for David thy father's sake." 1 *Kings* xi. In this passage there is an ellipsis of *thee* after *notwithstanding*. *That* refers to the former part of the sentence, *I will rend the kingdom from thee*, notwithstanding *that*, (declaration or determination,) in thy days I will not do it. In this and in all cases, *notwithstanding*, either with or without *that* or *thee*, constitutes the case absolute or independent.

"It is a rainy day, but *notwithstanding that*, the troops must be reviewed," that is, the rainy day not opposing or preventing. *That*, in this case, is a substitute for the whole first clause of the sentence. It is to that clause what a relative is to an antecedent noun, and *which* may be used in the place of it, *notwithstanding which*, that is, the rainy day.

"Christ enjoined on his followers not to publish the cures he wrought, but *notwithstanding his injunctions*, they proclaimed them." Here, *notwithstanding his injunctions* is the case independent or absolute, the injunctions of Christ not opposing or preventing.

This word answers precisely to the Latin *non obstante* and both are used with nouns or with substitutes for nouns, for sentences or for clauses of sentences. So in the Latin phrase, *hac non obstante, hoc* may refer to a single word, to a sentence, or to a series of sentences.

O.

O is the fifteenth letter, and the fourth vowel, in the English alphabet. The shape of this letter seems to have been taken from the circular configuration of the lips in uttering the sound. It corresponds in figure with the Coptic *O*, and nearly with the Syriac initial and final *vau*, and the Ethiopic *ain*. In words derived from the Oriental languages, it often represents the *vau* of those languages, and sometimes the *ain*; the original sound of the latter being formed deep in the throat, and with a greater aperture of the mouth.

In *English*, *O* has a long sound, as in *tone, bone, groan, cloak, roll, droll*: a short sound, as in *lot, pled, rod, song, lodge*, and the sound of *oo*, or the Italian *u*, and French *ou*, as in *move, prove.* This sound is shortened in words ending in a close articulation, as in *book, foot.*

The long sound of *O* is usually denoted by *o*, at the end of a word or syllable, as in *bone, lonely*; or by a servile *e*, as in *moan, foal.* It is generally long before *ll*, as in *roll*: but it is short in *doll, loll*, and in words of more syllables than one, as in *folly, volley.*

As a *numeral*, O was sometimes used by the ancients for 11, and, with a dash over it, (Ō,) for 11,000.

Among *the Irish*, O, prefixed to the name of a family, denotes progeny, or is a character of dignity; as, O'Neil; O'Carrol.

Among *the ancients*, O was a mark of triple time, from the notion that the ternary, or number 3, is the most perfect of numbers, and properly expressed by a circle, the most perfect figure.

O is often used as an exclamation, expressing a wish.

O, were he present! *Dryden.*

It sometimes expresses surprise.

Shakspeare uses O for a circle or oval.

Thus that quality of a rose which is perceived by the sense of smell, is an *object* of perception. When the *object* is not in contact with the organ of sense, there must be some medium through which we obtain the perception of it. The impression which *objects* make on the senses, must be by the immediate application of them to the organs of sense, or by means of the medium that intervenes between the organs and the *objects*.

2. That to which the mind is directed for accomplishment or attainment, end, ultimate purpose. Happiness is the *object* of every man's desires; we all strive to attain to that *object*. Wealth and honor are pursued with eagerness as desirable *objects*.

OB'LI GATE, *v. t.* [L. *obligo*, *ob* and *ligo*, to bind.]

To bind, as one's self, in a moral and legal sense, to impose on, as a duty which the law or good faith may enforce. A man may *obligate* himself to pay money, or erect a house, either by bond, by covenant, or by a verbal promise. A man *obligates* himself only by a positive act of his own. We never say, a man *obligates* his heirs or executors. Until recently, the sense of this word has been restricted to positive and personal acts; and when moral duty or law binds a person to do something, the word OBLIGE has been used. But this distinction is not now observed.

The millions of mankind, as one vast fraternity, should feel *obligated* by a sense of duty and the impulse of affection, to realize the equal rights and to subserve the best interests of each other. *Brandist*

OF, (ov,) *prep.* [Sax. *of*, G. *ab*, Sw. Ice. Dan. and D *af*; L. *ab*, but originally *af*, Gr. *απο*. The primary sense is departing, issuing, or proceeding from; but this sense has been modified by usage.]

From or out of; proceeding from, as the cause, source, means, author, or agent bestowing.

I have received *of* the Lord that which also I delivered to you. — 1 Cor. xi.
For it was *of* the Lord to harden their hearts. — Josh. xi.
It is *of* the Lord's mercies that we are not consumed. — Lam. iii.
The whole disposing thereof is *of* the Lord. — Prov. xvi.
Go, inquire *of* the Lord for me. — 2 Chron. xxxiv.
That holy thing that shall be born *of* thee. — Luke i.

Hence *of* is the sign of the genitive case, the case that denotes production; as, the Son *of* man, the son proceeding *from* man, produced from man. This is the primary sense, although we now say, produced *by* man. "Part *of* these were slain;" that is, a number separate, for *part* denotes a division, the sense then is, a number *from* or *out of* the whole were slain. So, also, "some of these were slain;" that is, some *from* or *out of* the others. "I have known him *of* old, or *of* a child;" that is, *from* old times, *from* a child. "He is *of* the race of kings;" that is, descended *from* kings. "He is *of* noble blood or birth, or *of* ignoble origin." "No particle of matter, or no body, can move *of* itself," that is, by force or strength *proceeding from* itself, derived *from* itself.

"The quarrel is not now *of* fame and tribute, or *of* wrongs done," that is, *from* fame or wrongs, as the cause, and we may render it, *concerning*, *about*, *relating to*.

"*Of* this little he had some to spare," that is, some *from* the whole. It may be rendered *out of*.

"*Of* all our heroes thou canst boast alone;" that is, thou alone *from* the number of heroes. This may be rendered *among*.

"The best *of* men, the most renowned *of* all," that is, the best *from* the number of men, the most renowned *from* the whole; denoting primarily separation, like *part*.

"I was well entertained *of* the English consul," that is, entertained *from* the consul, my entertainment was *from* the consul. This use is obsolete, and we use *by* in lieu of it.

"This dous *of* right belong to us;" that is, *from* right, *de jure*; our title proceeds from right.

"The chariot was all *of* cedar," that is, made *from* cedar. So we say, made *of* gold, made *of* clay, an application corresponding with our modern use of *from*; manufactured *from* wool, or *from* raw materials. Hence we say, cloth consisting *of* wool. "This is a scheme *of* his own devising," that is, *from* his own *devising* or device. "If any man minister, let him do it as *of* the ability which God giveth;" that is, as *from* the ability, as the source of action.

"*Of* happy, he is become miserable," that is, *from* happy; *from* being happy, he has passed to being miserable. "*Of* necessity this must prove ruinous," that is, *from* necessity, as the cause or source. "*Of* a hundred take fifty; that is, *from* a hundred, or *out of* a hundred, *from* among a hundred.

Of sometimes implies a part or share.

It is a duty to communicate *of* those blessings we have received. *Bp. Sanderson.*

From is, then, the primary sense of this preposition; a sense retained in *off*, the same word differently written for distinction. But this sense is appropriately lost in many of its applications; as, a man *of* genius, a man *of* courage, a man *of* rare endowments, a fossil *of* a red color, or *of* a hexagonal figure. He lost all hope *of* relief. This is an affair *of* the cabinet. He is a man *of* decayed fortune. What is the price *of* corn? We say that *of*, in these and similar phrases, denotes property or possession, making *of* the sign of the genitive or possessive case. These applications, however, all proceed from the same primary sense. That which proceeds from, or is produced by, a person, is naturally the property or possession of that person; as, the son *of* John; and this idea of property, in the course of time, would pass to things not thus produced, but still bearing a relation to another thing. Thus we say, the father *of* a son, as well as the son *of* a father. In both senses, other languages also use the same word, as in the French *de*, *dela*, and Italian, *di*, *dell*. *Of*, then, has one primary sense, *from*, departing, issuing, proceeding *from* or *out of*, and a derivative sense denoting possession or property.

OR, a termination of Latin nouns, is a contraction of *ur*, a man, or from the same radix. The same word, *ur*, is in our mother tongue, *were*, and from this we have the English termination *er*.

It denotes an agent, as in *actor*, *creditor*. We unite it to many words of English origin, as in *lover* as we do *er* to words of Latin and Gr origin, as in *astronomer*, *laborer*. In general, *or* is annexed to words of Latin, and *er* to those of English, origin.

OR, *conj.* [Sax. *other*, G. *oder*. It seems that *or* is a contraction of *other*. "Tell us by what auctorite thou doost these thynges. (*Other* who is he that gave the thys auctorite?" *Tyndale's New Testament.*]

A connective that marks an alternative. "You may read *or* may write," that is, you may do one of the things at your pleasure, but not both. It correspondes to *either*. He may study law, *or* medicine, *or* divinity, *or* he may enter into trade.

Or sometimes begins a sentence, but in this case it expresses an alternative with the foregoing sentence. *Matt.* vii. and ix.

In *poetry*, *or* is sometimes used for *either*.

That them or to conceive or tell [illegible]
Is equally impossible *Cowley*

office or order; hence, to invest with a ministerial function or sacerdotal power; to introduce and establish or settle in the pastoral office with the customary forms and solemnities; as, to *ordain* a minister of the gospel. In *America*, men are *ordained* over a particular church and congregation, or as evangelists without the charge of a particular church, or as deacons in the Episcopal church.

OR'DEAL, *n.* [Sax. *ordal* or *ordel*, G. *urtheil*, D. *ordeel*. The last syllable is *deal*, to divide or distribute. The sense of the prefix is less obvious. Wilkins supposes *or* to signify *without*, as in some Saxon words it has that sense, and *ordeal* to signify without difference or distinction of persons, entire judgment. In Saxon, *ord* signifies origin, cause, beginning, prime. In G. *ur* signifies prime, very, original, *wrwort*, primitive word. In Dutch, *oor* is the *ear*, *oorlog*, war. But this prefix would seem to be the same as in *furlow*, (furlough;) for, in G. *urlaub*, D. *oorlof*, Dan. *orlov*, Sw. *orlof*, is a furlow, and this indicates that *or* is a corruption of *far* or *for*. In Welsh, this word is *gordal*, which Owen compounds of *gor*, high, superior, extreme, above, and *tal*, reward, requital, and *gordal* signifies not only *ordeal*, but an over-payment, a making satisfaction over and above. *Or*, then, may signify *out*, *away*, and in *ordeal* may denote *ultimate*, *final*. But the real sense is not obvious. The practice of ordeal, however, seems to have had its origin in the belief that the substances used had each its particular presiding deity, that had perfect control over it.]

1. An ancient form of trial to determine guilt or innocence, practiced by the rude nations of Europe, and still practiced in the East Indies. In England, the ordeal was of two sorts, *fire-ordeal* and *water-ordeal*; the former being confined to persons of higher rank, the latter to the common people. Both might be performed by deputy, but the principal was to answer for the success of the trial.

Fire-ordeal was performed either by taking in the hand a piece of red-hot iron, or by walking barefoot and blindfold over nine red-hot plowshares, laid lengthwise, at unequal distances; and if the person escaped unhurt, he was adjudged innocent; otherwise he was condemned [illegible]

Water-ordeal was performed, either by plunging the bare arm to the elbow in boiling water, or by casting the person suspected into a river or pond of cold water, and if he floated without an effort to swim, it was an evidence of guilt, but if he sunk he was acquitted.

Both in England and Sweden, the clergy presided at this trial. It was at last condemned as unlawful by the canon law, and in England it was abolished by an order in council of Henry III. *Blackstone.*

It is probable our proverbial phrase, to *go through fire and water*, denoting severe trial or danger, is derived from the ordeal; as also the trial of witches by water.

2. Severe trial; accurate scrutiny. [Unusual.]

Those of the column are the base, the shaft, and the capital; those of the entablature are the architrave, the frieze, and the cornice. The hight of the Tuscan column is 14 modules or semidiameters of the shaft at the bottom, and that of the entablature 3 1 2. The hight of the Doric order is 16 modules, and that of the entablature nearly 4, that of the Ionic is 18 modules, and that of the entablature 4 2 3, that of the Corinthian order is 20 modules, and that of the entablature 5. The Sax. participle *agen*, Dan. *egen*, is the English *own*. *Ought* is a derivative tense, and was formerly used in the sense of *owed*. PLA'TO-NISM, *n.* The doctrines of Plato and his followers. Plato believed God to be an infinitely wise, just, and powerful Spirit; and that he formed the visible universe out of preëxistent amorphous matter, according to perfect patterns or ideas eternally existent in his own mind. Philosophy he considered as being a knowledge of the true nature of things, as discoverable in those eternal ideas after which all things were fashioned. In other words, it is the knowledge of what is eternal, exists necessarily, and is unchangeable; not of the temporary, the dependent, and changeable; and of course it is not obtained through the senses; neither is it the product of the understanding, which concerns itself only with the variable and the transitory, nor is it the result of experience and observation. But it is the product of our *reason*, which, as partaking of the divine nature, has innate ideas resembling the eternal ideas of God. By contemplating these innate ideas, reasoning about them, and comparing them with their copies in the visible universe, reason can attain that true knowledge of things which is called *philosophy*. Such appears to have been the system of Plato himself, so far as it can be gathered from his Dialogues, which are not systematic treatises, but free conversations. His professed followers, the Academics and the New Platonists, differed considerably from him, yet are called *Platonists*.

The person drinking *pledged* his guest by drinking first, and then handing the cup to his guest. The practice is frequent among the common people in America to this day; the owner of the liquor, taking the cup, says to his friend, *I pledge you*, and drinks, then hands the cup to his guest, a remarkable instance of the power of habit, as the reason of the custom has long since ceased.

There are as many different modes in which poisons operate as there are different and distinct medicinal powers of any material activity. But by *usage*, *policy* is now more generally used to denote what is included under *legislation* and *administration*, and may be defined, the art or manner of governing a nation; or that system of measures which the sovereign of a country adopts and pursues, as the best adapted to the interests of the nation. Policies are *valued* or *open*; *valued*, when the property or goods insured are valued at prime cost; *open*, when the goods are not valued, but, if lost, their value must be proved. *Park. Blackstone.*

1. In a *philosophical sense*, the faculty of doing or performing any thing; the faculty of moving or of producing a change in something; ability or strength. A man raises his hand by his own *power*, or by *power* moves another body. The exertion of *power* proceeds from the will and, in strictness, no being destitute of will or intelligence can exert *power*. Power in man is *active* or *speculative*. *Active power* is that which moves the body, *speculative power* is that by which we see, judge, remember, or, in general, by which we *think*.

Power may exist without exertion. We have *power* to speak when we are silent. *Locke. Reid.*

Power has been distinguished also into *active* and *passive*, the power of *doing* or *moving*, and the power of *receiving* impressions or of *suffering*. In *scripture*, *passive power* is an absurdity in terms. To say that gold has a *power* to be melted, is improper language, yet for want of a more appropriate word, *power* is often used in a passive sense, and is considered as twofold, viz., as able to *make*, or able to *receive*, any change. *Cyc.*

See the verb.]

1. It appears that *praise*, *price*, *prize*, are all from one root, the primary sense of which is, to lift, to raise, or rather to strain. So from L. *tollo*, *extollo*, we have *extol*. Now, in Dan. *roser*, Sw. *rosa*, signifies to praise, and it may be questioned whether this is *praise* without a prefix. The Latin *pretium*, W. *prid*, is probably from the same root, denoting that which is *taken* for a thing sold, or the *rising* or amount, as we use *high*; a high value or price, corn is *high*. In Pers. افراز *afaraz*, is high, lofty; افرازيدن *afraziden*, to extol. Qu. Fr. *prôner*, for *preconer*.]

1. In *a general sense*, a declaration, written or verbal, made by one person to another, which binds the person who makes it, either in honor, conscience, or law, to do or forbear a certain act specified; a declaration which gives to the person to whom it is made a right to expect or to claim the performance or forbearance of the act. The promise of a visit to my neighbor gives him a right to expect it, and I am bound in honor and civility to perform the *promise*. Of such a *promise* human laws have no cognizance; but the fulfillment of it is one of the minor moralities which civility, kindness, and strict integrity, require to be observed.

2. In *law*, a declaration, verbal or written, made by one person to another for a good or valuable consideration, in the nature of a covenant, by which the promiser binds *himself*, and, as the case may be, his *legal representatives*, to do or forbear some act, and gives to the promisee a legal right to demand and enforce a fulfillment.

A promise may be *absolute* or *conditional*; *lawful* or *unlawful*; *express* or *implied*. An *absolute promise* must be fulfilled at all events. The obligation to fulfill a *conditional promise* depends on the performance of the condition. An *unlawful promise* is not binding, because it is void; for it is incompatible with a prior paramount obligation of obedience to the laws. An *express promise* is one expressed in words or writing. An *implied promise* is one which reason and justice dictate. If I hire a man to perform a day's labor, without any declaration that I will pay him, the law presumes a *promise* on my part that I will give him a reasonable reward, and will enforce such *implied promise*.

The labor of inventing, making, or producing any thing, constitutes one of the highest and most indefeasible titles to *property*. *Property* is also acquired by inheritance, by gift, or by purchase. *Property* is sometimes held in common, yet each man's right to his share is common land or stock is exclusively his own. 11 Propriety. [*Not in use.*] *Camden.*

Literary property, the exclusive right of printing, publishing, and making profit by one's own writings. No right or title to a thing can be so perfect as that which is created by a man's own labor and invention. The exclusive right of a man to his literary productions, and to the use of them for his own profit, is entire and perfect, as the faculties employed and labor bestowed are entirely and perfectly his own. On what principle, then, can a legislature or a court determine that an author can enjoy only a *temporary property* in his own productions? If a man's right to his own *productions in writing* is as perfect as to the *productions* of his farm or his shop, how can the former be abridged or limited, while the latter is held without limitation? Why do the *productions* of *manual labor* rank higher in the scale of rights or *property*, than the *productions* of the *intellect*?

Thus 5 is to 10 as 8 to 16, or A is to B as C is to D; that is, 5 bears the same relation to 10 as 8 does to 16. Hence we say, such numbers are in *proportion*. *Hutton.*

That which is morally good is to be desired and *prosecuted.* *Wilkins.*

This word signifies either to *begin* and *carry on*, or simply to *continue* what has been begun. When I say, "I have devised a plan which I have not the courage or means to *prosecute*," the word signifies to *begin to execute.* When we say, "The nation began a war which it had not means to *prosecute*," it signifies to *continue to carry on.* The latter is the genuine sense of the word, but both are well authorized. We *prosecute* any work of the hands or of the head. We *prosecute* a purpose, an enterprise, a work, studies, inquiries, &c.

It is applied to civil suits for damages, as well as to criminal suits, but not to suits for debt. We never say a man *prosecutes* another on a bond or note, or in assumpsit; but he *prosecutes* his right or claim in an action of debt, detinue, trover, or assumpsit. So we say, a man *prosecutes* another for assault and battery, for a libel or for slander, or for breaking his close. In these cases, *prosecute* signifies to *begin* and to *continue* a suit. The attorney-general *prosecutes* offenders in the name of the king or of the state, by information or indictment.

Prosecute differs from *persecute*, as in law it is applied to the legal proceedings only, whereas *persecute* implies cruelty, injustice, or oppression.

2. The institution and carrying on of a suit in a court of law or equity, to obtain some right, or to redress and punish some wrong. The *prosecution* of a claim in chancery is very expensive. Malicious *prosecutions* subject the offender to punishment.

Thus a Gentile converted to Judaism is a *proselyte*; a pagan converted to Christianity is a *proselyte*, and we speak familiarly of *proselytes* to the theories of Brown, of Black, or of Lavoisier. The word primarily refers to converts to some religious creed.

The Welsh *pruz* is from tending out or reaching, hence *pryder*, anxiety, a stretching of the mind. The sense of *prude* is probably from stretching, straitness, stiffness, and the sense of *wise* is derivative. *Prudence* is from the same root, implying care, a tension of mind.]

It is sometimes mere caution or circumspection.

Prudence is principally in reference to actions to be done; and this means, order, season, and method of doing or not doing. *Hale.*

Q.

Q IS the seventeenth letter of the English alphabet, an articulation borrowed from the Oriental *koph* or *qoph*, Ch. and Heb. ק, Samaritan 𐤒, Syriac ܩ, Arabic ق *kaf*. It is supposed to be an articulation more deeply guttural than that of *k*; indeed, it may have been pronounced as we pronounce *qu*, for we observe that, in the Latin language, from which the moderns have borrowed the letter, it is always followed by *u*, as it is in English. This letter is not in the Greek alphabet. In our mother tongue, the Anglo-Saxon, this letter is not used, but, in the place of *qu*, *cu*, or, more generally, *cw* is used, as in *cwic*, quick, *cwen*, queen. This letter is superfluous, for *ku* or *koo*, in English, have precisely the same sounds as *qu*. It is alleged that, in expressing *q*, the cheeks are contracted, and the lips put into a circular form, for the passage of the breath — circumstances which distinguish it from *k*. This appears to be a mistake. This position of the organs is entirely owing to the following letter, *u*, and *kwestion* and *quest on* are pronounced precisely alike, and with the same configuration of the organs. For *qu* in English the Dutch use *kw*, the Germans *qu*, the Swedes and the Danes *qv*, which answer to our *kw*. The Gothic has a character which answers to *qu*. It appears, then, that *q* is precisely *k*, with this difference in use, that *q* is always followed by *u* in English, and *k* is not. Q never ends an English word. Its name, *cu*, is said to be from the French *queue*, a tail.

As a *numeral*, Q stands for 500, and, with a dash, Q, for 500,000.

Used *as an abbreviation*, Q. stands for *quantity* or *quantum*, as, among *physicians*, *q. pl.*, *quantum placet*, as much as you please, *q. s.*, *quantum sufficit*, as much as is required, or as is sufficient.

Q. D. is sometimes used for *quasi dixisset*, as if he had said.

Among *mathematicians*, *Q. E. D.* stand for *quod erat demonstrandum*, which was to be demonstrated, *Q. E. F.*, *quod erat faciendum*, which was to be done.

In *the notes of the ancients*, Q. stands for *Quintus* or *Quintius*; *Quint.* for *Quintilius*; and *Quæs.* for *quæstor*.

In *English*, Q. is an abbreviation for *question*.

This definition is defective, and as applicable to many other properties as to quantity. A definition strictly philosophical can not be given. A *simple quantity* is expressed by one term, as $+a$, or $-abc$; a *compound* is expressed by more terms than one, connected by the signs plus, or — minus, as $a+b$, or $a-b+c$. Quantities which have the sign + prefixed, are called *positive* or *affirmative*; those which have the sign — prefixed, are called *negative*. *Day's Algebra.*

2. Restraint of intercourse to which a ship is subjected, on the presumption that she may be infected, either for forty days or for any other limited term. R.

R is the eighteenth letter of the English alphabet, and an articulation *sui generis*, having little or no resemblance in pronunciation to any other letter But from the position of the tongue in uttering it, it is commutable with *l*, into which letter it is changed in many words by the Spaniards and Portuguese, and some other nations, as *l* is also changed into *r*. It is numbered among the liquids and semi-vowels, and is sometimes called the *canine* letter It is uttered with a guttural extrusion of the breath, and in some words, particularly at the end or after a labial and a dental letter, with a sort of quivering motion or slight jar of the tongue Its English uses, which are uniform, may be understood by the customary pronunciation of *rod, room, rose, bar, bare, barren, disturb, catarrh, free, brad, pride, drip, drag, drown.*

In words which we have received from the Greek language, we follow the Latins, who wrote *h* after *r*, as the representative of the aspirated sound with which this letter was pronounced by the Greeks It is the same in the Welsh language But as the letter is not aspirated in English, *h* is entirely superfluous; *rhapsody, rheum, rhetoric*, being pronounced *rapsody, reum, retoric.*

As a numeral, R, in *Roman authors*, stands for 80, and with a dash over it, R, for 80,000. But in *Greek*, ρ, with a small mark over it, thus, ρ΄, signifies 100, and with the same mark under it, it denoted 1000 × 100, or 100,000. In *Hebrew*, ר denoted 200, and with two horizontal points over it, ר 1000 × 200, or 200,000.
